

# Capabilities Statement

Techserv is a project management company specializing in program management, training, technical assistance, and workforce development. We serve customers in healthcare, higher education, and public safety.

## What We Can Do

### Strategy Consulting

Techserv advises government, academic, healthcare, and non-profit organizations on high-level decision-making, using deep industry knowledge and on-going data driven solutions.

### Stakeholder Collaboration

We conduct market research and key informant interviews to ensure that the right stakeholders are at the table. We then introduce a culture of accountability with every stakeholder meeting by defining: topic, discourse, summary, call to action and key deliverables.

### Data Collection & Analysis

We map and manage data flow, data analysis, and outcomes reporting. We train our clients' workforce on proper data collection methods and standards, software tools, how to read reports, and change management.

### Sourcing & Procurement

We create a sourcing and procurement model based on your company's needs and select the best product or service for the category of expenditure.

### Grant Management

Techserv strategizes, collaborates and implements to make sure that if you are awarded a grant, it will be implemented effectively, and you will have the data to back it up.
